Crops	Stage	Insect/Pest/ Variety	Advisory
Garlic	Growing	Thrips and  Alternaria leaf blight	For thrips control spray neem seed extract 5% and make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml in 10 liters of water at 10 days interval. To prevent blight disease infestation in garlic spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure. Do not over irrigate to prevent leaf blight disease. Apply supplementary dose of nitrogen as urea @ 54 kg/ha at 30-35 days after sowing.
Chick pea	Growth/branching	Monitor the crop regularly for prodenia and heliothes infestation	“T” shaped bird perches in and around crop field to be installed for natural controlling of prodenia and heliothes population. If infestation cross ETL spray Emamectin Benzoate 5 % SG 7 gm in 10 litres of water.
Cumin	Sowing/germination	Gujarat cumin-4	Carry out sowing of cumin, If kharif crop is harvested. Seed must be treated with fungicides Captan or Thiram or Carbendazim @ 2.0 gm/ kg to prevent wilt.
