Mayurbhai get the knowledge about net house technology from VLW, KVK. and make decision to made net house on his field. He got benefit of 50 per cent subsidy from Horticulture department and started net house in 1000 sq.mt. at a cost of 5.5 lacs.

He successfully sows capsicum at a distance of 36 x 24 inch. Irrigated crop with every day 30 to 45 minutes/day by drip according to temperature. To maintain temperature by starting fogger 10 seconds when temperature rise. Since last four month he got the income Rs. 9,000/- per month. He expects 9 month this income continue and than after he grows another crop.

As a success of this income generation activity he decided to make 4000 sq.mt new green house and also start to construct it.

As a Result of his successful cultivation of capsicum under net house their neighbor farmers also decided to make such type of green house in their farm. He also advise to farmers in various programme such as training, telephone during Krishi Mahotsav.
